

Belmont Properties: Real Estate

Belmont properties' is a corporation that owns and manages residential buildings located throughout the Lower Mainland and Victoria, British Columbia. It is a third generation family owned and run company that provides homes to tenants of all walks of life. As steps are being taken to expand the business Living Blueprint was approached by Belmont Properties to develop the corporate brand and supporting materials. Having a logo gave Belmont properties a fresh face and set them forward on their new path. The logo was placed onto the vehicles and uniforms providing tenants and staff with a stronger connection to the company. The website was designed by Living Blueprint and will act as a client managed database for the company to use and grow with.
